PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience designing, developing, and supporting enterprise software solutions across tax technology and healthcare technology. Experienced in developing and maintaining commercial tax software products including **H&R Block Professional (HRB Professional)** and **ATX Tax Software** within the Wolters Kluwer Tax & Accounting division. Expertise in C#, .NET, SQL Server, Azure, REST APIs, ETL development, CI/CD pipelines, PowerShell automation, and software modernization. Proven success delivering secure, scalable, and customer-focused applications that improve operational efficiency, support regulatory compliance, and enhance end-user experiences.

CORE COMPETENCIES

- Enterprise Software Development
- Tax Software Development
- Healthcare Technology Solutions
- Application Modernization
- Backend Development
- REST API Development
- Cloud Engineering
- Azure DevOps
- CI/CD Automation
- Database Development
- ETL & Data Integration
- Production Support
- Performance Optimization
- Agile Software Development
- Secure Software Development
- Software Architecture
- Process Automation
- Technical Documentation
- Cross-Functional Collaboration
- HIPAA Compliance

TECHNICAL SKILLS

Programming Languages

C#, SQL, PowerShell, XML

Frameworks & Platforms

.NET Framework, .NET Core, ASP.NET, REST APIs, Windows Services

Cloud & DevOps

Microsoft Azure, Azure DevOps, CI/CD, Git

Databases

SQL Server, Stored Procedures, Query Optimization, Database Design, Performance Tuning

Data & Integration

SSIS, ETL Development, Data Migration, EDI, ANSI X12, XML

Reporting & Collaboration

SSRS, SharePoint, Confluence, Visio, Lucidchart

Security & Quality

SonarQube, Black Duck, Secure SDLC Practices

Methodologies

Agile, Scrum, SDLC

PROFESSIONAL EXPERIENCE

Wolters Kluwer - Tax & Accounting Division

Software Engineer II

September 2019 – September 2026

- Design, develop, test, deploy, and maintain enterprise software applications supporting tax preparation and compliance solutions.
- Develop and enhance commercial tax software products, including **H&R Block Professional (HRB Professional)** and **ATX Tax Software**, supporting tax professionals and accounting firms.
- Build scalable, secure, and maintainable .NET applications aligned with business and technical requirements.
- Participate in all phases of the Software Development Lifecycle (SDLC), including requirements of analysis, design, development, testing, deployment, and production support.
- Collaborate with product owners, architects, QA engineers, and business stakeholders to deliver customer-focused enhancements and software releases.
- Develop and support backend services, APIs, and enterprise applications using modern software engineering practices.
- Support Azure DevOps CI/CD pipelines, release validation activities, deployment processes, and production monitoring initiatives.
- Troubleshoot and resolve production issues while ensuring application stability and minimizing downtime.
- Conduct peer code reviews to improve maintainability, security compliance, and code quality standards.
- Optimize performance through code refactoring, database tuning, monitoring, and automation initiatives.
- Create and maintain technical documentation, process diagrams, application support materials, and engineering knowledge repositories.
- Serve as subject matter expert and primary maintainer for multiple business-critical applications and services.
- Promote secure development practices using SonarQube, Black Duck, and established engineering quality standards.

Key Contributions

- Contributed to the development and maintenance of industry-leading tax software platforms supporting tax preparation, filing, and compliance workflows.
- Improved software reliability and maintainability through automation, refactoring, and process improvement initiatives.
- Successfully delivered multiple enterprise software releases while meeting quality and operational objectives.

Zelis Healthcare

Software Engineer

June 2015 - September 2019

- Designed, developed, and maintained enterprise healthcare applications using C#, .NET, SQL Server, and Microsoft Azure technologies.
- Automated operational processes that reduce manual effort and improved processing accuracy across healthcare workflows.
- Developed and optimized SQL Server for stored procedures, queries, and database objects supporting high-volume healthcare transaction processing.
- Designed and maintained SSIS ETL solutions for large-scale data integration, transformation, and migration initiatives.
- Built reporting solutions using SSRS and SharePoint to improve operational visibility and business decision-making.
- Automated recurring administrative tasks using PowerShell scripts and custom .NET utilities.
- Supported Azure-hosted applications through deployment management, database migrations, and application upgrades.
- Collaborated with QA, Operations, Product, and EDI teams to deliver scalable and maintainable healthcare solutions.
- Mentored junior team members and contributed to application architecture and design discussions.

Key Contributions

- Improved healthcare data integration processes through ETL optimization and automation.

- Reduced manual operational effort by implementing automated solutions and workflow enhancements.
- Enhanced application reliability and performance through database and application-level optimizations.

Zelis Healthcare (Formerly GlobalCare Inc.)

IT Intern

June 2013 - June 2015

- Supported development and operations teams in HIPAA-compliant healthcare environments.
- Collaborated with trading partners for end-to-end EDI testing and implementation activities.
- Mapped HCFA 1500 and ANSI X12 healthcare datasets using proprietary integration platforms.
- Developed XML and X12 mappings utilizing Software AG WebMethods technologies.
- Queried and maintained Microsoft SQL Server databases supporting healthcare operations.
- Created PowerShell and batch automation scripts to reduce manual administrative workload.

EDUCATION

Bachelor of Science (B.S.), Computer Science

May 2015
